## Weekly Summary

The homepage defaults to the 'Weekly Summary', which displays all submissions made by all users for a specified singular week. The datepicker must be set to a Monday. The table is sorted by reporting user (A-Z).

## Submission List / Manage Submissions

The 'Submission List' displays all submissions made by a single user for a specified period of time. The dropdown defaults to the user currently signed in if one or more submissions exist. If no submissions exist, the user dropdown will default to blank. You can select different users from the dropdown (who have previously submitted) and view their data, but updating and deleting is limited to your own submissions. A user's name will not appear in the dropdown until at least one submission has been made. The table is sorted by reporting date (newest to oldest).

## New Submission

To add your schedule for a new week, click 'New Submission'. The reporting date must be set to a Monday or else you will not be able to submit your schedule. Duplicate submissions (same user and same reporting date) are not allowed. If a duplicate warning appears, you may just need to change the reporting date or you will need to return to the previous page and edit the original submission for that date.

## Update Submission

If a submitted schedule needs to be updated, you can click/highlight the record you want to edit and then click the 'Update Submission' button. You will not be able to update the reporting date on this page. Only the actual schedule information may be updated. If the wrong reporting date was entered, you will need to go back and delete the submission.

## Delete Submission

If a submitted schedule needs to be deleted, you can click/highlight the record you want to remove and then click the 'Delete Submission' button. Once the submission has been deleted it cannot be undone. Deleted submissions will show up in the 'Submission List', but will not appear in the 'Weekly Summary'.

## Export Table

To download a CSV file of all schedules currently displayed, you can click the 'Export Table' button.
